ABOUT ME

Senior Software Engineer with 5+ years of experience building production systems across fintech, e-commerce, and platform infrastructure. Specialized in backend development, microservices architecture, distributed systems, and third-party integrations. Experienced with US-based clients and global teams. English proficiency: C1 Advanced (Cambridge CAE certified).

EXPERIENCE

Senior Software Engineer

NocNoc

Argentina

Aug 2025 - Present

- Building seller integration layer (public API, Shopify, SFTP, Seller Center). Owned the Amazon Scraper service — a business-critical microservice for product data synchronization with pull-based rate control (SQS + concurrency-limited consumers).

Senior Software Engineer

itti (UenoBank)

Argentina

Oct 2024 - Aug 2025

- Architected and built the Insurance Manager microservice from scratch — the core policy issuance engine powering every insurance product (life, mobile, commercial, home). Designed resilient integrations with legacy providers using circuit breaker and async patterns.

Semi-Senior Software Engineer

Emi Labs

Argentina

Aug 2023 - Apr 2024

- Built the integration layer for US and Mexico clients at an AI-powered recruitment platform (Walmart, Coca-Cola FEMSA, Heineken). Balanced client-specific customizations with a scalable cross-client architecture.

Semi-Senior Software Engineer

Kavak

Argentina

Jul 2022 - Aug 2023

- Fintech division (Capital): automated core banking processes with greenfield microservices in Go, Node.js (TypeScript), and Java (Spring Boot). Built backend services with PostgreSQL and internal backoffice (Angular, NestJS).

Software Development Analyst → Semi-Senior Engineer (Promoted)

Mercado Libre

Argentina

Feb 2021 - Jul 2022

- Built Mercado Libre's new AWS IAM-inspired authorization platform — critical path for every MELI application. Developed multi-language SDKs (Java, Go, Python, Node.js) and Docker sidecar deployment. On-call for production incidents at massive scale.

Engineering Associate

Southworks

Argentina

Apr 2020 - Oct 2020

- Built greenfield applications for Discovery Channel (US). Node.js, TypeScript, AWS (Pulumi), CircleCI, Datadog. All communication in English.

SKILLS

Languages: Java, Go, TypeScript/Node.js, Kotlin, Python

Frontend: Angular, React

Cloud & Infra: AWS, Docker, Pulumi, Argo CD, CircleCI, Jenkins

Databases: PostgreSQL, MySQL, NoSQL (Firestore, DynamoDB)

Observability: Datadog, NewRelic, Kibana, AWS CloudWatch

EDUCATION

CERTIFICATIONS

AWS Certified Cloud Practitioner, <i>Amazon Web Services</i>	2020
Certificate in Advanced English (CAE) — C1, <i>University of Cambridge</i>	2016
HSK Level 3 — Mandarin Chinese, <i>Hanban Confucius Institute</i>	2018
